Profile

Frontend Developer specializing in building scalable and high-performing interfaces with React, Next.js, TypeScript, and Tailwind CSS. Key differentiator: I take a design from Figma and deploy it to production without relying on an intermediate designer, thanks to my UX/UI background. Experience delivering on demanding international agile teams (Hogarth) and on freelance projects for e-commerce clients, wineries, and game studios. Focus on clean code, reusable components, and accessibility.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Wordpress

Tools and workflow: Git/GitHub (GitFlow), Vercel/Netlify

Styles & Frameworks: Tailwind CSS, Material UI, Responsive design, Component architecture

Design: Figma, Design systems, wireframing, high-fidelity prototyping, Adobe Illustrator

Status and data: API REST, Firebase, React Query, Redux

Backend & Data: Node.js, SQL, SQL Workbench, Firebase

Professional Experiences

Web Developer & UI Designer, InRide Media 05/2026 – Present

- I designed a design system in Figma with +30 reusable components that accelerated the design-to-development handoff by 15% and unified the UI across 4 screens.
- Deployed sites and web applications with HTML, CSS and JavaScript, delivering clean and performant code with a Lighthouse above 90

Frontend Developer & UI Designer, Freelance 2024 – Present

- Developed end-to-end web solutions for 4 international clients, companies, and game studios (Lunlunta Wines, Visdan Agency, Pepola Studio, GetOut Studio) using React and Next.js.
- Built responsive interfaces in direct collaboration with clients and designers, reducing load time to 2s using lazy loading and image optimization.
- I redesigned the UI for Visdan Agency to align with the client's brand identity, improving engagement and clarity.

Web Developer, Hogarth 07/2025 – 09/2025

- Position as a Web Developer working on an account for one of the world's leading technology companies. I fulfill the role of Localization and Adaptation of the company's website, working alongside a highly demanding and agile team.

Education

UX/UI Design, CoderHouse 2024 – 2025

Frontend Developer, CoderHouse 2022 – 2023

Featured Projects

DevPulse 01/2026 – 02/2026

GitHub profile analysis tool. Implemented with Next.js, Firebase, and REST APIs. Enables detailed metrics for repositories and technical stacks. Use of technologies such Next.js.

PlayBook UI 10/2025 – 12/2025

Curated UI component library. Developed with Tailwind CSS and CSS for use with different components, facilitating code reuse for other developers.
