Work Experiences

InRide Media | Web Developer & UI Designer | 2026 (May – Present) | Freelance

- UI Design: Creation of high-fidelity prototypes and design systems using Figma, ensuring an intuitive and visually appealing user experience.
- Web Development: Implementation of websites and web applications using modern technologies, guaranteeing clean and high-performing code.

Hogarth | Web Developer | 2025(Jul – Sept) | Temporary contract

- Position as a Web Developer working on an account for one of the world's leading technology companies. I fulfill the role of Localization and Adaptation of the company's website, working alongside a highly demanding and agile team.

Frontend Developer & UI Designer | Freelance | 2024 – Present

- Development of end-to-end solutions for international clients, leading companies, and video game studios (Lunlunta Wines, Pepola Studio, GetOut Studio).
- Implementation of designs for web projects.
- I developed responsive web interfaces and collaborated directly with clients and designers to achieve objectives and ensure high-quality delivery.
- Creation and refinement of designs to better reflect the brand and the client's vision.

Visdan Agency | Frontend Developer | 2024 - 2025

- I developed and optimized responsive web applications using Next.js and Tailwind CSS, achieving an improvement in the loading speed detected in Lighthouse.
 - I translated Figma prototypes into functional code with high visual fidelity.
-

Featured Projects

DevPulse| 2026 (Jan- Feb) | Project

GitHub profile analysis tool. Implemented with Next.js, Firebase, and REST APIs. Enables detailed metrics for repositories and technical stacks. Use of technologies such Next.js,

PlayBook UI | 2025 (Oct - Dec) | Project

Curated UI component library. Developed with Tailwind CSS and CSS for use with different components, facilitating code reuse for other developers.
